Subject: Genovesa

Danielle:

As you may know, the BDSV has finally started working and as such, Genovesa came back online on Sunday.

However, it came back online to a curtailment scenario, limiting us to about [REDACTED] boepd, owing to work on the FGC which is likely to persist through the week.

While I understand that MC 519 is behind Host Leases, we are ahead of 3rd party production (i.e. Calliope). My understanding is that Calliope is currently producing, however, according to the PHA MC 519 should have priority over Calliope Production and as such, MC 519 should be afforded the opportunity to ramp all the way up before Calliope can produce.

Can you please check on this and let me know if I am missing anything?

Thanks

Nathan
